Future Scope of "Resolve Now: Your Platform for Online Complaints":

- **AI-Powered Complaint Analysis:**
  Integrate AI and machine learning to analyze complaint patterns, predict common issues, and recommend solutions automatically.

- **Multi-Language Support:**
  Expand accessibility by supporting regional and international languages, making the platform user-friendly for a broader audience.

- **Mobile App Integration:**
  Develop Android and iOS apps to provide users with on-the-go access to complaint registration and tracking.

- **Analytics Dashboard for Admins:**
  Implement advanced dashboards for data visualization, complaint trends, agent performance, and resolution rates.

- **Third-Party API Integration:**
  Enable integration with government, corporate, or consumer protection databases for automatic escalation and validation.
